

Jamie Strachota
Secretary, Women In Bio

Current Company: Management Consultant
Current Title: Executive Director

Professional Background

With multidisciplinary skills and more than a decade of experience in the life sciences industry, Jamie Strachota serves as the Executive Director for Women In Bio and also serves as the Secretary on the Board for Women In Bio. Additionally, she consults as a Federal Government Contractor utilizing her strong scientific, business and strategic background to produce technology transfer marketing materials from patents or other scientific or technical source material, and in marketing those opportunities to potential partners. Prior to this, Jamie worked for the Biotechnology Industry Organization (BIO) as a Business Development/ Strategic Alliances Manager where she was responsible for marketing the trade organization’s member benefits and working closely with state affiliates to increase the reach of BIO’s affinity program. Prior to her work with BIO, she was a Technology Transfer Marketing Associate for a government contractor. During this time, she worked for several federal laboratories to facilitate the IP technology transfer from the federal labs to the private sector. In 2010, one of her technology transfer initiatives won a national award for Excellence in Technology Transfer from the Federal Laboratory Consortium (FLC) for Technology Transfer.

Jamie began her career as a laboratory technician at the Walter Reed Army Institute of Research (WRAIR) working on vaccine development, including Dengue virus, Adenovirus and Lyme Disease. Her education includes a B.S. in Microbiology from the University of Wisconsin-La Crosse and dual M.S. and MBA degrees in Biotechnology from the Johns Hopkins University.
